TASK 1: WRITE A JAVA PROGRAM IN STATIC POLYMORPHISM.

```
class Printer {  
    void print(int a) {  
        System.out.println("Printing integer: " + a);  
    }  
    void print(String name) {  
        System.out.println("Printing string: " + name);  
    }  
    void print(double value) {  
        System.out.println("Printing double: " + value);  
    }  
    void print(int a, int b) {  
        System.out.println("Printing sum: " + (a + b));  
    }  
    public static void main(String[] args) {  
        Printer obj = new Printer();  
        obj.print(10);  
        obj.print("Hello World");  
        obj.print(5.5);  
        obj.print(20, 30);  
    }  
}
```

```
Printing integer: 10  
Printing string: Hello World  
Printing double: 5.5  
Printing sum: 50  
=== Code Execution Successful ===
```
